Distribution Licenses

- 1) Is your Company distributing or planning to distribute devices that will be;
- incorporate or integrate the Redistributables or parts thereof; or
 - where the main user interface or substantial functionality of such unit, when used by a Customer, is provided by Application(s) or otherwise depends on the Licensed Software, regardless of whether the Redistributables are distributed together with the hardware or not.

Yes, such devices have been distributed. The date of first distribution is: MONTH-YEAR

Yes, we have plans to distribute such devices. The date of anticipated first distribution is: MONTH-YEAR

No, we do not distribute such devices, nor do we have any current plans to do so.

Only choose one option above based on whether one or more products will be (or are currently being) distributed. All options are filled out for example purposes only.

- 2) If your response to #1 was “yes” please be advised that the Qt Company requires you to report your distribution license usage quarterly. The reports must be delivered within 30 days of the end of each fiscal quarter (unless otherwise contractually agreed). The form below is provided for your reporting use.

| Product/Device/App Application Built with or Using Qt Software* | Type of License | | Classification | | Licenses Purchased to date | Units distributed to date | Additional Licenses forecasted <i>Add estimated amount & dates</i> |
|---|-----------------|------------|----------------|-------------|----------------------------------|---------------------------------|--|
| | Open Source | Commercial | Device | Application | | | |
| Product “ALPHA” | | X | | X | 3 | 0 | Estimate is 1000 Licenses. Distribution is expected to start in May 2021. |
| Product “BETA” | X | | X | | 0 | 0 | Distribution to start in June 2021. |
| Product “DELTA” | | X | X | | 1 | 10 | Prototypes have been distributed. Positive customer reviews indicate likely selling. Estimated licenses is 10,000. Distribution would start with 2022 vehicle sales cycle in August 2021. Confirmation will come by January 2021. |

*includes all products, devices or applications created using the Qt Open Source or Qt commercial software, including but not limited to, a) internally deployed or distributed; b) externally deployed, sold and/or distributed to the Company’s customers or users

Additional Comments by the Company

Additional comments with regards to the Company's Qt development and distribution/deployment initiatives, projects, applications and/or devices that might not be covered by the tables above:

____ Notes about the products should be listed here. Any intentions or call-outs which may be important to for the Qt Company to know about regarding products, as well as use of Qt Commercial Licenses and Qt Open Source. _____
